

Secure Domain

Integrated security services protecting people and assets

Part of the ACES Group of Companies, Secure Domain currently secure and service approximately 6,500 hectares of precincts, places and parklands, with more than \$6 billion in assets/infrastructure, 300 tenancies and 65 million annual visitors for NSW Government and Commercial and Retail businesses with 145,000+ sqm retail space, 700+ tenancies and 7000 car spaces for leading property management groups.

Services

Secure Domain is a full service security and related services company. We are committed to providing the best solution to protect and maintain your asset. Our Management team are hands on and will form part of your security solution.

We have thirty years experience in integrated security services focused on protecting people and property and enhancing customer engagement. We provide managed services and customised integrated solutions.

Our culture is dedicated to providing services that meet and exceed our clients' expectations. People are the key to any businesses success and our staff are all directly employed by Secure Domain; we have no subcontractors. Their diversity provides a broad range of skills and capability and this together with extensive training via our in-house RTO is vital to providing a skilled and motivated workforce.

We are certified with ISO 9001, 14001 and 4801, Quality, Environmental and WH & S. This drives our employees and management to deliver optimum services to the precise requirements of each of our stakeholders.

Our expertise, technical capability and innovative approach in the management of commercial outcomes for our clients is second to none.

Commercial and Government Property

We are a recognised leader in provision of security related services for property/facilities management and place management.

Working with multiple clients we have an enhanced understanding of the dynamics of both the commercial and government sector requirements and we have customised our services to ensure we exceed expectations. We currently secure and service approximately 6,500 hectares of government precincts, places and parklands, which possess more than \$6 billion in assets/ infrastructure that service 300 tenancies and have 65 million annual visitors for NSW government alone. This includes many of Sydney's unique historical, cultural and recreational assets.

We provide extensive services to commercial properties including concierge, dedicated patrols, access control, asset protection and niche solutions for individual property risks. Where required we successfully assimilate our services as if they are our client's services. Our company's ability is to provide a unique tailored solution to meet even the most complex operating environment.

Retail

With a foundation in providing customer focused security via extensively trained employees, Secure Domain is the ideal contract partner for retail property managers.

Our retail services include security services for one of Australia's largest property management portfolio retail sites in NSW with over 145000 sqm retail, 700+ tenancies and 7000 car spaces. Our Services extend across all retail areas and are supported by extensive staff training in technology, observation and customer service.

Aviation

With proven core strengths in protection of people, infrastructure and assets and excellence in risk and emergency management Secure Domain provides specialist aviation security services. This includes passenger and staff screening, baggage screening, freight screening, catering screening, airside inspections and corporate security for international airlines at Sydney International Airport, satisfying exacting international aviation standards.

Our approach to training, innovation and our enterprise agility ensures that Secure Domain is responsive to the dynamic and evolving regulatory, technical and compliance requirements essential to mitigating emerging security threats.

Corporate Security

Our corporate capability extends across broad industry sectors. Customer interaction is a fundamental aspect of all of our corporate security services. Across the diversity of workplace environments Secure Domain employees will represent you and successfully engage with your clients.

Whether securing Sydney's premier broadcast and commercial offices, our famed tourist attractions, metropolitan recreational, motorsport or entertainment facilities Secure Domain applies highly engaged management and tailors our quality assured processes to each client specification.

From control room management, access control, concierge services, patrols, personal safety, traffic control, car park management, special events, emergency planning and response, Secure Domain will meet the challenge of your unique corporate security.
